In view of the amendment and remarks filed on March 15<sup>th</sup> 2005, the art rejection has been withdrawn. The pending claims however are unpatentable as following:

***Claim Rejections - 35 USC § 112***

1. Claims 1, 3, and 19 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claims 1 & 19, applicant is claiming a polymer layer which is synthesized by an aromatic dianhydride and a diamine component. Applicant is suggested to put in the ratio of the aromatic dianhydride and the diamine component.

Furthermore, in claim 1, applicant is suggested to delete "d." and "e."; since d. and e. are clauses further describe the polyimide layers.

Claim 3 is structurally indefinite, as it is not corresponding to the structure in claim 1. Claim 1 has a structure of conductive layer/ high T<sub>g</sub> polyimide layer/ low T<sub>g</sub> polyimide layer.

In claim 19, it is unclear what "a pre-circuitized organic core material" is referring to? It is not clear whether or not a metal or a conductive layer is included?

***Claim Objections***

2. Claims 6-8 and 19 are objected to because of the following informalities:

In claim 6-8, the phrase "selected from the group comprising" should be changed to – selected from the group consisting of --. In claim 19, "(b" should be changed to -- b) --. Appropriate correction is required.

***Allowable Subject Matter***

3. The following is a statement of reasons for the indication of allowable subject matter: applicant is suggested to incorporate the ratio between the aromatic dianhydride and the diamine component into the independent claims.
